LINK NUMBER ASSIGNMENTS

Today Steve Crocker asked me to announce that from now on link numbers 2-71 (decimal), inclusive, are to be valid for use in connections. Accordingly, the Host-Host Protocol Document, which I am currently writing, will contain the following "declarative specification".

Links are assigned as follows:

Link Number	Assignment
0	Control link
2-71	Available for connections
1, 72-190	Reserved-not for current use
191	To be used only for measurement work under the direction of the Network Measurement Center at UCLA
192-255	Available for private experimental use
